Job Placement Report

This report is regarding the job placement rate for the academic year 2020/2021 for three semesters (first, second, and summer). A Google Form was used to ask students if they were regular or bridging students, if they were employed within 6 months after graduation, or if they were working and bridging students if their job title changed within 6 months after graduation. The total number of graduates was 96, of which 63 responded to the questionnaire. Of these 63 graduates, 53 of them were employed or had their titles changed within 6 months after graduation. This means that the job placement rate was 84.1%. This is summarised in the table below.

The academic year 2020/2021	
Total number of graduates	96
Responded to the questionnaire	63
Employed/ title changed within 6 months after graduation	53
Job placement rate	84.1%
