Tutorial

Creating a Basic Search on EBSCOhost
EBSCOhost is a powerful online reference tool that offers a variety of full text databases and popular databases from leading information providers. In this tutorial, we will look at conducting a search from the Basic Search screen of EBSCOhost.

Begin by entering your search terms in the search box. Click the **Search** button to view results or click **Search Options** to apply limiters and expanders.
**Search Options** allow you to limit or expand your search results before viewing the result list. Choose one of the available Search Modes and depending upon the databases you are searching, you may see the ability to limit results by Full Text articles, Scholarly (Peer Reviewed) Journals, or a particular publication. After applying limiters and expanders, click **Search**.

You can refine your results using the options in the **Refine Results** column. Results can be filtered by source types, such as Academic Journals, Magazines, or Newspapers, by clicking the checkboxes next to the desired source type.
Depending on the database being searched, you can also use the facets in the left column to limit your search results to specific subjects, publications, or titles from a particular publisher, in addition to several other available options. You can click the **Show More** link to apply multiple selections at once.
1. *Climate Change and Agriculture: An Overview of Farmers Perception and Adaptations in Balambat Tehsil, District Dir Lower, Pakistan.*

The present research was aimed to determine the ability of farmers to detect *climate change* and how they have adapted to whatever *climate change* they believe has occurred. Farmers have indigenous
